Overview Plans Resources Follow-up and reports Participants More

The overview page contains updates, bulletins, tasks, and any current course planner.

The planner is completed by your teacher for each course and will contain important lesson and homework information for your classes as well as the resources you will need to complete any assignments.

Resources is the "filing cabinet" of the course. This is where you can find important files and past assignments.

Follow-up and Reports contains the course gradebook, standards mastery and other reports. This is NOT where you will find your course grade, as teachers uses Infinite Campus/Parent Portal for grade reporting.

Participants lists all the students and teachers in a course.

If your teacher uses portfolios, you will access your portfolio and manage it here.
